

# See and Feel the **Difference** in **Real Time!**

The iRespond -Touch is the most robust student response system available today. It features the only graphics capable touch remote screen on the market. Each remote displays your questions and all possible answers — eliminating the need for paper!

Using our proprietary Teacher's Dashboard software, the iRespond-Touch allows you to download and collect homework, take attendance, lecture, track formative assessment, give timed tests, achieve 100 percent student participation, receive instant grading, produce meaningful reports, send remediation to students, and much more.

The iRespond-Touch is great in the classroom, in the lecture hall, in a training facility or even at city hall!

# Teacher's Dashboard

The Teacher's Dashboard is the heart and soul of *iRespond*. The Teacher's Dashboard is included with all of our hardware and software solutions. Use *iRespond* to easily navigate through your teaching activities with real-time feedback and results.

The Teacher's Dashboard was designed for all day use. You can collect homework, give lectures, tests, and even conduct course critiques with real-time results and immediate feedback. The software is also fully integrated with Microsoft PowerPoint for lectures. All results may be exported to grade books and student management systems.
