

## PROFESSIONAL DEVELOPMENT SOLUTIONS FOR STUDENT ENGAGEMENT AND RESPONSE TECHNOLOGY

iRespond is proud to offer iRespond Academy; comprehensive professional development solutions designed to enable teachers to succeed in their classroom use of student responders.

Our professional development is:

- ✓ Designed and delivered by educators
- ✓ Hands-on, in group workshops and/or coaching models
- ✓ Seamlessly aligned to your curriculum goals
- ✓ Planned around your technology investment
- ✓ Focused on advancing 21<sup>st</sup> Century Learning

iRespond Academy was formed because we believe that supplying you with the latest technology is simply the beginning. Schools can only receive a “return on investment” for their technology purchases if it helps advance student outcomes. This cannot happen unless your teachers are not only trained in technology, but shown effective strategies for student engagement and curriculum integration.

Our workshops topics include:

- ✓ iRespond Essentials
- ✓ iRespond Content Integration
- ✓ Formative Assessment with iRespond
- ✓ Creating Active Learning Environments

We can also design a customized solution around your particular infrastructure and requirements. Our education solutions team can consult with you to create a summer institute, or design a year-long professional development track with assessment.

iRespond Academy offerings can be funded through:

- ✍ School budgets
- ✍ Entitlement Funds
- ✍ Grants
